

INDUSTRIAL FURNITURE

Workbenches

- The entire structure of the construction provides protection against ESD
- Individual elements of the structure are powder-coated with anti-static paint in RAL 7035 gray color
- The IEC 61340-5-1 standards are met
- Made of 40x40 profiles
- Full strength welds
- The total load capacity is 350 kg
- Available choice of manual or electric adjustment
- Adjustable height from 750 - 1100 mm, on rectification screws to compensate for floor irregularities
- Ergonomic or rectangular tabletop available
- The tabletops of the furniture are made of conductive boards 25mm thick in light grey RAL 7035 color with dark grey ABS edges 2mm thick resistant to mechanical damage
- The plate is resistant to abrasion and temperature with long-term exposure to 50 °C
- Customization to suit individual customer requirements
- A wide range of accessories
- An option to make a corner table available

Accessories

- LED lighting
- Cart for balancer suspension
- Shelves full width or 1/2, metal/board, inclined option
- Slats for hanging the containers
- LCD monitor mount
- Document holder
- Perforated panels full width or 1/2
- Additional wall segment
- Articulated handle
- Power strip hidden in the ESD housing 6-8 sockets with a switch
- Ergonomic or rectangular tabletop
- Grounding point
- Keyboard shelf
- Drawers mounted under the tabletop
- PC shelf
- 1-4 drawer containers soft close option
- Footrest

Variants of legs

In H-type tables, there is a height adjustment in increments of 50mm + the option of adjustment between these 50mm increments with leveling screws.

In L-type tables, there is smooth height adjustment. Electric height adjustment option.

Custom projects

Order picking station

PCB separation station

Additionally, we produce individual projects such as:

- Storage cabinets
- Transport racks
- Carts
- Screens
- And others

Other solutions

Basic trolley

Shelves trolley

Tilt top trolley table

Platform hand truck trolley

Mobile small stand

Storage trolley with ESD containers

Stencil storage and cleaning work station

Welded rack

SMT stencil storage cabinet

Storage cabinet on wheels

Lockable storage cabinet

Rotating storage cabinet with ESD containers

Chairs

We are a Polish manufacturer of anti-static chairs, industrial chairs, workshop chairs, laboratory chairs, and "Cleanroom" chairs.

Our chairs are characterized by uncompromising reliability, high quality of materials used, the robustness of construction, and high resistance to typical factors occurring in production processes in ESD zones.

We create chairs that provide widespread functionality, great freedom, and comfort of movement for the worker and meet the latest industrial health and safety guidelines.

The chair has been designed to meet strict standards in the electronics industry. It fulfills its purpose of protecting the user and sensitive components

- Five-branch base in chromium-plated steel or aluminum
- Seat height adjustment via gas column
- Equipped with wheels coated with conductive rubber or sliding glides
- Different types of fabric available, vinyl and polyurethane, depending on the model
- Ground resistance RG $10^6 - 10^8$ Ohm
- The surface resistance of fabric RP $10^5 - 10^6$ Ohm
- Certified for safety and ergonomic use
- Available in ESD, industrial, and laboratory versions
- in accordance with the standard PN-EN 61340-5-1:2017 and ANSI/ESD S.20.20.2021

Available accessories:

- Various types of armrests
- Footrest
- Various types of wheels
