Termio-15 Digital data logger

High class temperature data logger.

termoprodukt

Precise digital measuring device Termio-15

Termio-15 is a high class precise temperature data logger which can be used in many different industries like Pharmacy, Laboratory, Transport and Gastronomy. The device is powered from battery.

Technical data	
Temperature range	-30°C to 70°C
Temperature accuracy	-/+0,3°C or better -30°C to 70°C
Dimensions	45x100x19 mm
Protection	IP65-electronics
Power	1x lithium battery 3.6V (1 / 2AA) included
Sample rating interval	1 measurement per 30 seconds
Record frequency	From 1 minute
Producer	Termoprodukt
Resolution	0.01°C
Memory	32 000 readings
Dimensions	45 mm × 100 mm × 19 mm
Interface	USB
Case material	ABS plastic

Termio-15 Features:
- Min/Max temperature and humidity
- Hold function
- Start/Stop recording done by button, computer or from time/clock
- Light weight (85g)
- Low battery indication
- Approximately 8760 hours at 8 °C
- Simple to set up and use
- Alarm indication arrow on the display and blinking diode
- Supplied with battery

Every device is calibrated in termoprodukt laboratory
